

## PRODUCT LIST

### CLINICAL BIOCHEMISTRY REAGENTS

- |                                         |                              |                              |
|-----------------------------------------|------------------------------|------------------------------|
| 1. Acid Phosphatase                     | 16. Chloride                 | 33. LDL Cholesterol – Direct |
| 2. ADA                                  | 17. Cholesterol              | 34. LDH                      |
| 3. Albumin                              | 18. Cholinesterase           | 35. Lipase                   |
| 4. Alkaline Phosphatase –<br>AMP Buffer | 19. CK-NAC                   | 36. Magnesium                |
| 5. Alkaline Phosphatase –<br>DEA Buffer | 20. CK-MB                    | 37. Microalbumin             |
| 6. Ammonia                              | 21. Copper                   | 38. Micro Protein            |
| 7. Amylase                              | 22. Creatinine Single/Double | 39. Phosphorus UV            |
| 8. AST (SGOT)                           | 23. Creatinine Enzymatic     | 40. Potassium                |
| 9. ALT (SGPT)                           | 24. HbA1C                    | 41. Sodium                   |
| 10. Bi-Carbonate/CO <sub>2</sub>        | 25. HDL Cholesterol – PPT    | 42. Total Protein            |
| 11. Bilirubin (T&D)                     | 26. HDL Cholesterol – Direct | 43. Triglycerides            |
| 12. Bilirubin Direct                    | 27. G6PDH                    | 44. Urea Berthelot           |
| 13. Bilirubin Total                     | 28. Gamma – GT               | 45. Urea GLDH                |
| 14. Calcium Arsenazo-III                | 29. Glucose                  | 46. Uric Acid                |
| 15. Calcium OCPC                        | 30. Glucose Hexokinase       | 47. Zinc                     |
|                                         | 31. Iron                     |                              |
|                                         | 32. UIBC                     |                              |

### SEROLOGY

- |                        |                        |                |
|------------------------|------------------------|----------------|
| 1. ASO - Latex         | 4. RA - Turbidimetric  | 7. WIDAL Slide |
| 2. ASO - Turbidimetric | 5. CRP - Latex         |                |
| 3. RA - Latex          | 6. CRP - Turbidimetric |                |

### CELL COUNTER REAGENTS

- |            |         |            |
|------------|---------|------------|
| 1. Diluent | 2. Lyse | 3. Cleaner |
|------------|---------|------------|

## PRODUCT LIST

### SYSTEM PACK

- |                                        |                                       |                     |
|----------------------------------------|---------------------------------------|---------------------|
| 1. ACE                                 | 17. CK –MB                            | 34. IgM             |
| 2. ADA                                 | 18. Copper                            | 35. Iron            |
| 3. Albumin                             | 19. Creatinine Single Reagent         | 36. UIBC            |
| 4. Alkaline Phosphatase-<br>DEA Buffer | 20. Creatinine 5:1 Ratio              | 37. LDL Cholesterol |
| 5. Alkaline Phosphatase-<br>AMP Buffer | 21. Creatinine Enzymatic              | 38. LDH             |
| 6. ALT-GPT                             | 22. Cystatin C                        | 39. Lipase          |
| 7. AST-GOT                             | 23. D-Dimer                           | 40. Magnesium       |
| 8. Amylase                             | 24. Ferritin                          | 41. Microalbumin    |
| 9. Beta-2-Microglobulin                | 25. Gamma GT                          | 42. Micro Protein   |
| 10. Bi-Carbonate/CO <sub>2</sub>       | 26. Glucose Single Reagent<br>GOD/POD | 43. Phosphorus UV   |
| 11. Bilirubin Direct DCA               | 27. Glucose Hexokinase HK             | 44. PCT             |
| 12. Bilirubin Total DCA                | 28. HbA1c                             | 45. Total Bile Acid |
| 13. Calcium Arsenazo-III               | 29. HDL Cholesterol                   | 46. Total Protein   |
| 14. Cholesterol                        | 30. Homocysteine                      | 47. Triglycerides   |
| 15. Cholinesterase                     | 31. IgA                               | 48. Uric Acid       |
| 16. CK- NAC                            | 32. IgG                               | 49. Urea GLDH       |
|                                        | 33. IgE                               | 50. Zinc            |

### Controls & Calibrators

- |                                    |                             |                              |
|------------------------------------|-----------------------------|------------------------------|
| 1. ADA Calibrator                  | 9. HbA1c Control            | 17. LDL Calibrator           |
| 2. ADA Control                     | 10. HDL Calibrator          | 18. Lipase Calibrator        |
| 3. Chemistry Controls Normal       | 11. Homocysteine Calibrator | 19. Microalbumin Calibrator  |
| 4. Chemistry Controls Pathological | 12. Homocysteine Control    | 20. Multi Calibrator         |
| 5. CK-MB Calibrator                | 13. IgA/IgG/IgM Calibrator  | 21. Specific Protein Control |
| 6. CK-MB Control                   | 14. IgA/IgG/IgM Control     | 22. Total Bile Acid Control  |
| 7. Ferritin Calibrator             | 15. Immunological Control   |                              |
| 8. HbA1C Calibrator                | 16. UIBC Calibrator         |                              |

### Additional Lab Solutions

- |                        |                            |                          |
|------------------------|----------------------------|--------------------------|
| 1. Systemic Solution   | 3. Flow Cell Wash Solution | 5. Cuvette Wash Solution |
| 2. Multiclean Solution | 4. Probe Cleaning Solution |                          |
